

COVID Testing at My School

In a few weeks, our school will be starting something new to help keep us safe and healthy at school.

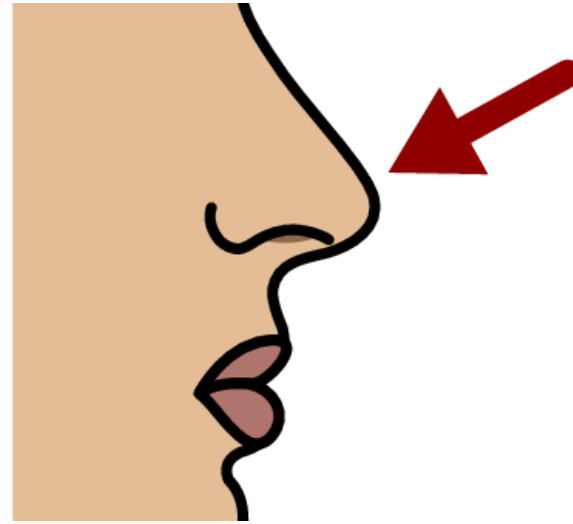

Each week that I come to school, my nurse will give me a COVID test. I will get tested even if I feel okay. This is to help keep my school safe and healthy.

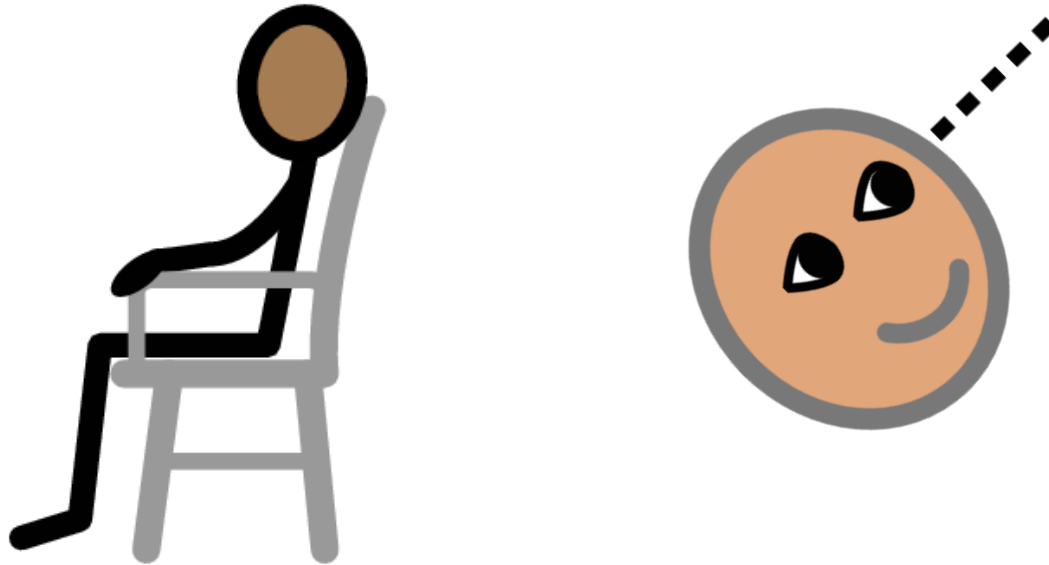

When it is time for my test, I will go see Mrs. Costello. She will be wearing special clothes to stay safe. Here are some things that she might wear.

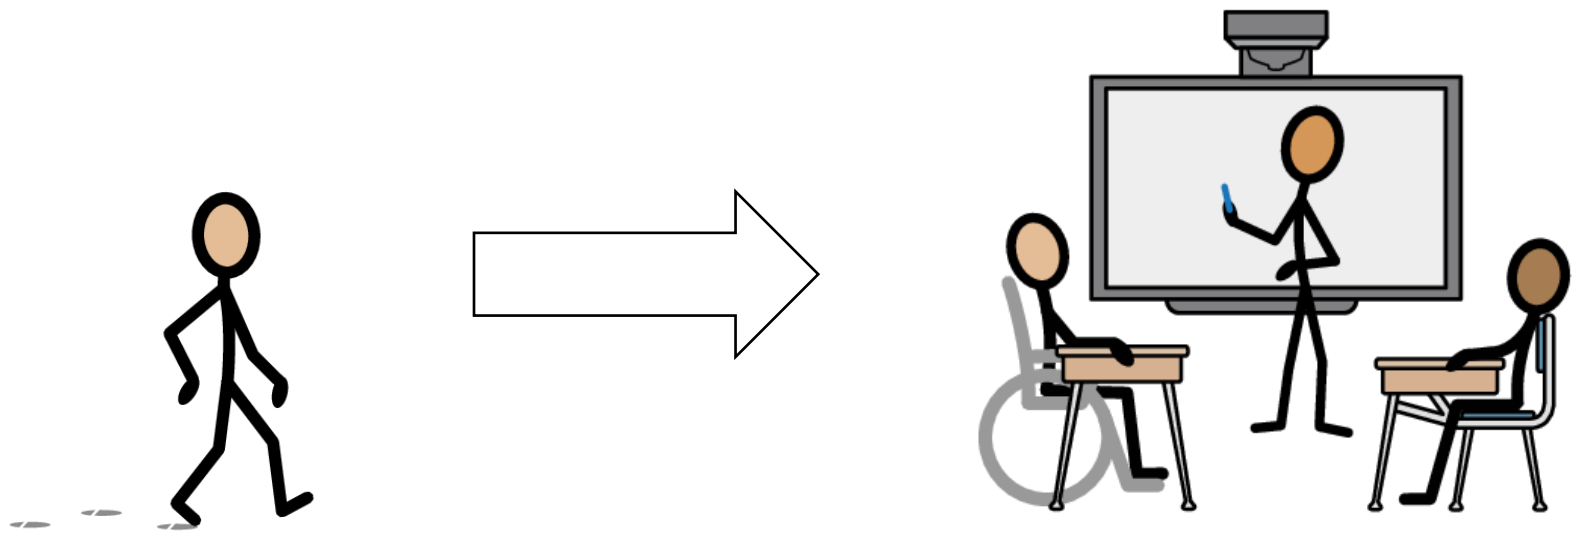

This is what she may look like! She might look different, but it is still Mrs. Costello. She is here to help.

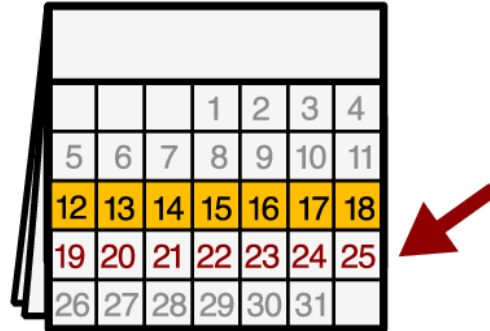

For my test, Mrs. Costello will put a Q-tip into my nose. My job is to sit still and look up.

The Q-tip might make my nose feel itchy or uncomfortable. I might want to sneeze. If I stay still and look up, my test will be over soon.

When the test is over, I can go back to my classroom. Mrs. Costello will tell my family if I am all done with tests or if I need to have another test.

The next week that I go to school, I will have the test again.
